

## DISCHARGE SUMMARY

|                   |                                      |                   |                                            |
|-------------------|--------------------------------------|-------------------|--------------------------------------------|
| Patient name      | Karan Mehta                          | UHID / IP No.     | UH10052026 / IP-1005                       |
| Age / Gender      | 30 Y / Male                          | Ward / Bed        | Twin sharing / 328                         |
| Date of admission | 24-Sep-2026 10:20                    | Date of discharge | 26-Sep-2026 13:45                          |
| Consultant        | Dr. Nikhil Rao, MS<br>(Orthopaedics) | Payer             | Saathi Health (Demo) -<br>SHI-2023-0047730 |

## Final diagnosis

Fracture distal end of left radius (ICD-10: S52.502A)

## Procedure / treatment

Open reduction and internal fixation (ORIF) with volar plate

## Presenting complaints

Fall from two-wheeler, pain and swelling of left wrist.

## Past history

No known diabetes or hypertension. No previous surgeries. No known drug allergies.

## Clinical findings on admission

Dinner-fork deformity, tenderness over distal radius. X-ray: displaced distal radius fracture.

## Course in hospital

ORIF with volar locking plate done under regional block on 24-Sep-2026. Below-elbow slab applied. Neurovascular status intact.

## Condition at discharge

Stable. Afebrile, vitals within normal limits, ambulatory, tolerating oral diet.

## Medication on discharge

| Medicine                | Dose / frequency | Duration |
|-------------------------|------------------|----------|
| Tab. Cefuroxime 500 mg  | 1-0-1            | 5 days   |
| Tab. Aceclofenac 100 mg | 1-0-1 after food | 5 days   |
| Tab. Calcium + Vit D3   | 0-1-0            | 30 days  |

## Advice &amp; follow-up

Review in OPD with Dr. Nikhil Rao after 7 days, or earlier if fever, pain, bleeding or any other warning signs. Report to emergency if needed.

Dr. Nikhil Rao
